Our selection criteria for potential stud ram lambs is very simple. They must have a great mother (from a strong maternal family) and be straight made, correct with a lot of muscle. If you would like to add mass and muscle to your Katahdins...1395 will do the job!

## 362-Spring Ewe Lamb

## 364-January Ram Lamb

### PBB 9239-1264

S: LU 07-003 054244  
D: 6014 Pink 9220 Brass

We are quite excited about this young prospect. He would be a great addition to any purebred flock looking for growth, muscle, and structural correctness.

## 365-January Ram Lamb

### PBB 9232-1285

S: LU 07-003 054244  
D: 619, 9228 Brass

This young ram is solid from the ground up. Out of our LU ram and PBB mother, this ram is very balanced with great growth, length, and structural correctness in addition to superior breed character.
